HW#6
1)

headptr

2a) No
2b) No

3a) Yes
b) Yes
c) Yes
d) Yes

4a) Yes
4b) No because list iterators cannot subtract another iterators. It can only increment and decrement
4c) Yes

5) No it wouldn't work correctly if x is the first element of the linked list. The code starts checking the second element and onward to see if its x.
